

HIPAA Eligibility Transaction System (HETS) User Interface (UI) R2009Q200 Release Summary

Document Version 0.1
Implementation Date: July 2009

R2009Q200 HETS User Interface (UI) Release

Summary of Impact on Trading Partners

The purpose of this summary document is to prepare users for the upcoming changes to the HIPAA Eligibility Transaction System (HETS) User Interface (UI). The R2009Q200 HETS UI release will address modifying data elements and display screens. Please refer to the following details for additional information.

1. Implementation of new Healthcare Procedure Coding System (HCPCS) code

The HETS UI will display the following new HCPCS code:

- 90669 – Pneumococcal (PPV)

This information will appear on the Preventive tab, covered in section 4.5.4 of the User Guide.

2. Change of “Co-Insurance” to “Co-Payment” on Inpatient Spell tab

On the Inpatient tab, the HETS UI will no longer display “Hospital Co-Insurance Days Remaining” or “SNF Co-Insurance Days Remaining”. Effective with this release, the HETS UI will display “Hospital Co-Payment Days Remaining” and “SNF Co-Payment Days Remaining”.

3. Correct the order in which Hospice data is returned

The HETS UI may return inconsistent hospice data depending on the date(s) of service used in the search criteria. Effective with this release, to be consistent with other beneficiary data, all hospice periods that intersect the requested date(s) of service will be displayed by the HETS UI on the Hospice tab.
